PRODUCT

Barbed Wire

- ▶ A **barbed wire**, otherwise called **barb wire**, less frequently as **bob wire**, in the southeastern United States, **bounced wire**, is a sort of **steel fencing wire** built with sharp edges or focuses organized at interims along the strands.
- ▶ It is utilized to develop modest fences and is utilized on dividers encompassing secured property. It is likewise a noteworthy component of the fortresses in trench fighting in the form of a **wire obstacle**.
- ▶ If someone attempts to ignore through or spiked metal, he will endure distress and perhaps damage.
- ▶ Security barrier requires just fence posts, **barbed wires**, and settling gadgets, for example, staples. It is easy to build and snappy to erect, even by an incompetent individual.

PRODUCT

- ▶ **Security fencing** was the main **barbed wire** innovation equipped for limiting steers. Wire wall were less expensive and less demanding to erect than their choices.
- ▶ One such option was Osage orange, a prickly shrub which was tedious to transplant and develop.
- ▶ The Osage orange later turned into a provider of the wood utilized as a part of making **barbed wire** for fence posts.
- ▶ When wire wall turned out to be broadly accessible in the United States in the late nineteenth century, they made it reasonable to fence considerably bigger territories than some time recently.

PRODUCT

Chainlink Fencing

- ▶ Also known as a cyclone fence, diamond mesh fence and wire mesh fence among other things, a chain link fence is a sort of fence that is woven with steel wires that are galvanized.
- ▶ Running horizontally, these wires are altered to form a zig zag shape, creating the conventional diamond design seen in chainlink fencing. It can be made from alloys of aluminium or pure stainless steel.
- ▶ The height and width of chainlink fences vary according to specifications. The configurations for chainlink fencing are highly automated - this allows for personalised orders that will suit the buyer's needs to the fullest.
- ▶ In chainlink fencing, the steel wires are helically bound to offer a seamless mesh devoid of knotting. It, instead, has twists at the end.

Chainlink Fencing

- ▶ A revolution in the fencing industry, chainlink fencing is an ergonomic yet sleek fencing solution for you.
- ▶ **Chainlink fences** are almost perennially long lasting as they require no replacement. They, additionally, also have ease of installation.
- ▶ All you need to do is unhook one of the many links and voila! The ending link is hooked for setting up.
- ▶ The main and primary purpose of **chainlink fencing** is to facilitate segregation or separation of periphery areas. It is one of the most fool-proof methods for securing the boundaries of any area.

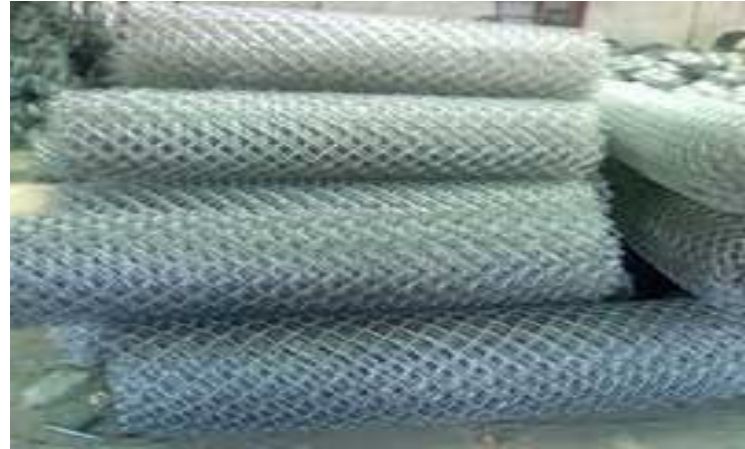

Features

- Easy installation , Resistive to all climate condition , Seamless
 - Longer service life , Low maintenance , Robust construction
 - Compact sized , Durable , High efficiency
